Once you have selected the correct clinic attach any referral narrative and the “Integrated Cardiology Service Referral Form” along with a recent ECG.

You can either book an appointment on behalf of the patient, please note that the appointment you book is a confirmed appointment, or print off the letter and hand to the patient. The patient then makes their own appointment in exactly the same way as they would if you were referring in to any other clinic via eRS (formally Choose and Book).

Tell the patient that they have been referred and that their referral will be triaged by a specialist at OUH and they will only be contacted if after triage it is thought that they should be referred to a specialist clinic rather than been seen in the Community.

The patient then books a convenient appointment for them.
