

MicroGuide Antibiotic Prescribing Guidelines App

The South Central Antimicrobial Network (SCAN) Guidelines for Antibiotic Prescribing in the Community have been used across many CCGs in the South Region for a number of years including Oxfordshire CCG. These guidelines provide advice on the effective and safe treatment of infections commonly presenting in primary care and are based on NICE and Public Health England advice with input from local experts.

From **15th June 2020**, the guidelines will be available on the digital platform [MicroGuide](#) – this can be accessed as an app on a phone or tablet device or via a web viewer on a desktop computer or laptop. For a transition period the guidelines can also continue to be accessed as a pdf on the www.nhsantibioticguidelines.org.uk website as well as via MicroGuide. To ensure that you have the most up to date version, please use the online link and do not save the pdf version on your computer, or print the guidelines. Please be reassured that both resources will be kept up to date while both are live online.

What's included in the app?

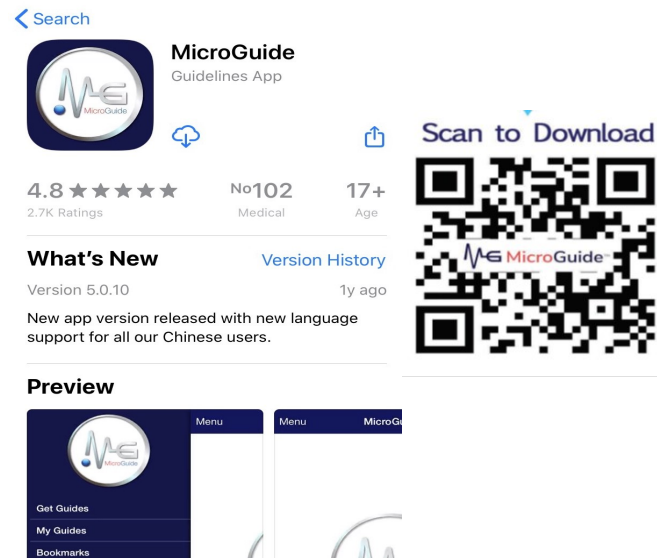

Guidelines to support antibiotic prescribing and antimicrobial stewardship in primary care

How to download

The app is available to download on either the app store (apple) or google play (android)

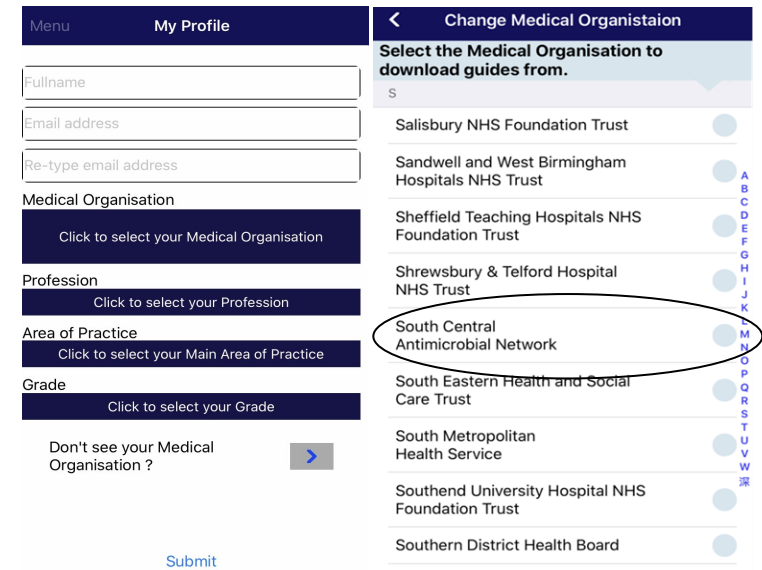

Either search for 'MicroGuide' or scan the QR code below

Web viewer available at: <https://viewer.microguide.global/SCAN/SCAN>

How to access the Guideline

Register yourself under the medical organisation 'South Central Antimicrobial Network' and select the SCAN guidance:

Please ensure you select the correct guideline, some trusts in your area will also use MicroGuide and therefore will be listed as an option.
